2. Financial investment

Held-to-maturity investments

Include term deposits at bank (including debentures, promissory notes), bonds, preferred stock. Party required to buy back at a certain time in the future and held-to-maturity loans for the purpose of earning periodically interests and interest on investments held to maturity date.

For investments held to maturity, if not already provision for bad debts in accordance with law and accounting assessing recoverability, accountants conduct reviews of the ability to recall. Where there is strong evidence suggesting that part or all of the investment may not be recoverable, the accountants shall record the periodical losses in financial expenses. In case of loss cannot be reliably determined, accountants conduct the accounting disclosures in financial statements about the recoverability of investments.

Loans receivables

Loans are contractually agreed upon between parties but are not traded or sold on the market like securities. Depending on the contract, contractual loans can be recovered in one lump sum at maturity or gradually recovered in installments.

For loans, if there is no provision for doubtful debts as prescribed by law, the accountant shall assess the recoverability. In case there is certain evidence that a part or the whole of the loan may not be recoverable, the accountant shall record the loss in the financial expenses of the period. In case the loss cannot be reliably determined, the accountant shall explain in the Financial Statements about the recoverability of the loan.

3. Receivables

Receivable are monitored in detail by maturity receivable, objects to be recovered and the type of original currency receivables, and other factors under the management of the Company.

The identification of necessary provision for doubtful debts is based on the items that are classified as short-term, long-term receivables on Balance Sheet. Provision for doubtful debts is made for each one based on the age of overdue debts or the estimated losses that may occur.

4. Inventory

Principles of recognizing inventories

The Company's inventories are assets bought to manufacture or sell in normal business period.

Inventories are stated at original cost. Where the net realizable value is lower than cost, inventories should be measured at the net realizable value. The costs of inventories comprise the purchase price, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Method of calculating inventories

The cost of inventory at the year-end is calculated by weighted average method.

Method of determining the value of unfinished products: unfinished production and business costs are collected for each project that is not completed or has not recorded revenue.

Method of accounting inventories

Inventory is recorded by perpetual.

Method of setting up provision for devaluation of inventories

Provisions for devaluation of inventories made at the end of the year are the excess of original cost of inventory over their net realizable value.
